

## Carlos Ramírez

---

**Core Skill:**

Automation Testing

**Industry Verticals:**

Retail

**Programming Languages:**

Java

.Net Core

JavaScript

SQL

**Databases:**

PostgreSQL

Microsoft SQL Server

**Tools & Techniques:**

Agile

Analysis

Cucumber

Docker

Git

HTML

IntelliJ IDEA

**Summary:**

Consultant tester with over 10 years of experience as a QA engineer and 6 years as a QA Automation Engineer. I've been involved in a diverse array of projects spanning agile and conventional methodologies across various industries. Proficient in both manual and automated testing, I excel in ensuring the quality and reliability of software products through comprehensive test strategies and meticulous attention to detail. Additionally, I have a proven track record of leading teams and consistently pioneering new processes and technologies to enhance project quality, remaining at the forefront of adopting cutting-edge methodologies and technologies to elevate project outcomes

**Qualifications:****Educational Background:**

Project Management Specialization, Universidad Escuela de Ingenieria de Antioquia, 2014

Electronic engineer, Universidad de Antioquia, 2012

**Certifications:**

ISTQB, ISTQB, 2015

Certified Scrum Master, Scrum Alliance, 2015

**Spoken Languages:**

English, B2

Spanish, Native

**Soft Skills:**

Active listening

Adaptability

Analysis

Analytical Thinking

Autodidact

Coaching

Collaborative

Commitment

Communication

Creativity

Critical Thinking

Curiosity  
Detail Orientation  
Flexibility  
Leadership  
Objective Oriented  
Persistence  
Proactivity  
Teamwork

## PROFESSIONAL EXPERIENCE

<b>Industry sector:</b> App		
<b>Consultant Tester</b>		
<b>2020-12-01 – Currently</b>		
<b>Project descriptions:</b>  Leader in online marketing and consumer acquisition platforms. Our websites are powered by an industry-leading marketing platform that operates across diverse financial and educational markets, collaborating with over 1000 unique partners. I'm part of the team at Quicken Loans®, an online lender aiming to transition its website to new technologies. Our team oversees this migration and creates components utilized across multiple projects within the company.	<b>Responsibilities:</b>  - Creating technical analysis and solution designs for the automation framework - Estimating tasks for project timelines - Leading, designing, planning, and executing tests using agile methodologies - Developing technical analysis and solution designs - Conducting automation, manual, and performance testing - Providing comprehensive documentation for design and implementation tasks - Assisting the development team in defining appropriate technical solution options	
<b>Programming Languages:</b>  JavaScript, Java, AWS, SQL	<b>Tools &amp; Techniques:</b>  Agile, AWS services, GitLab, Git, HTML, Jenkins, Jira, Jest, npm, Playwright, Postman, Visual Studio Code	<b>Testing:</b>  Accessibility testing, Automation Testing, BDD, CrossBrowser Testing, Jest, JIRA, Manual Testing, Page Object Model, Playwright, SauceLabs, TestRail

<b>Industry sector:</b> <b>Retail</b>		
<b>Senior Tester</b>		
<b>2017-07-10 – 2020-08-01</b>		
<b>Project descriptions:</b>  The project goals were centered around developing an internal tool to manage the inventory of various products offered by REI	<b>Responsibilities:</b>  • Lead, designed, planned, and executed tests using agile methodologies • Implemented automation testing with Selenium Web Driver - Java • Developed test scenarios in Cucumber using BDD • Conducted regression and exploratory testing • Executed API testing • Implemented continuous integration	
<b>Programming Languages:</b>  Java, AWS, HTML	<b>Tools &amp; Techniques:</b>  Scrum, Agile, Bamboo, Confluence, Cucumber, Git, HTML, Jest, Jenkins, IntelliJ IDEA, Maven, SQL	<b>Testing:</b>  Automation Testing, BDD, CrossBrowser Testing, JIRA, Manual Testing, Page Object Model, Selenium

<b>Industry sector: Design Sector</b>		
<b>Senior Tester</b>		
<b>2016-01-01 – 2017-07-10</b>		
<b>Project descriptions:</b>  Developing and ensuring the quality of various advertising materials created for the largest automobile group in the United States.	<b>Responsibilities:</b>  - Conducted manual testing as a QA Analyst. - Led a QA team, establishing strategies and testing plans for projects in both Scrum and Kanban methodologies. - Specialized in exploratory testing, mobile testing, regression, and UX evaluation. - Applied diverse test approaches and techniques, swiftly identifying risks and proposing preventive measures. - Oversaw and trained test teams, ensuring efficient management. - Monitored and upheld quality standards and compliance targets. - Independently initiated and executed an automation testing project (2 months).	
<b>Programming Languages:</b>  Java, HTML	<b>Tools &amp; Techniques:</b>  Scrum, TestRail, Agile, Confluence, Cucumber, Selenium, Git, IntelliJ IDEA	<b>Testing:</b>  Manual Testing, Automation Testing, Selenium, Cucumber, JIRA, Backend testing, CrossBrowser Testing

<b>Industry sector: Enterprise software</b>		
<b>Senior Tester</b>		
<b>2014-01-01 – 2015-12-31</b>		
<b>Project descriptions:</b>  ERP (Enterprise Resource Planning) system integrates various business processes and functions into a centralized platform. It manages and automates critical operations such as inventory, accounting, human resources, procurement, sales, and more. The goal is to enhance efficiency, streamline workflows, and provide comprehensive insights by allowing different departments to access and share information from a single database.	<b>Responsibilities:</b>  Here's a refined version: - Leading, designing, planning, and executing tests following agile methodologies. - Analyzing and interpreting test data to ensure system performance. - Configuration management expertise. - Proficient in Continuous Integration practices. - Proficiency in Regression and Integration Testing. - Skilled in Web Services Testing. Skilled in Web Services Testing.
