PROFESSIONAL EXPERIENCE

Industry sector: Gaming		
Project Manager for AAA Gaming Industry Client		
2023-10-30 – Currently		
Project descriptions: Project is a complete overhaul of the legacy Webstore, providing a new and enhanced User Experience, and a modernized look and feel.	Responsibilities: Worked on delivering version 2.0 of the webstore for a Mobile Game from a AAA Client. From definition of the requirements, to planning of the project, handling of resources, dealing with risks, ,all aspects of the Project Management discipline were handed within this project. I was the main point of contact from the project side with clients and stakeholders.

Industry sector: Healthcare		
Project Manager for Healthcare industry client		
2023-10-01 – Currently		
Project descriptions: Provide the client of Full Stack Developers and Quality Analysts that could help drive internal client projects to success.	Responsibilities: As a Project Manager i took care of the Governance of all 7 Staff Augmentation teams based in Latam. Took care of all team Ramp ups, Rotations, Feedback and mostly the Client and Stakeholder Management, being the front face of Endava with the client. As part of my tasks i also took care of the wellbeing of all projects team members. Helped and guided the teams in adopting and applying processes.

Industry sector: Retail		
Senior Project Manager at Hikko		
2022-04-04 – 2023-09-29		
Project descriptions:	Responsibilities: Led multiple high-impact Salesforce projects for key clients within the organization. Delivered customized solutions for a Telecoms industry company and Non Profit organizations, aligning with clients' needs, resulting in enhanced user experiences and increased operational efficiency. I played a key role in turning around a project that was in danger of being canceled. Through thorough analysis and re planification, building strong relationships with the stakeholders and working with the team to deliver high-quality work, we were able to ease any concerns, and eventually deliver a project that fulfilled expectations. • Scope, budget and schedule analysis and planification. • Team leadership • Communication Management, including reports both inhouse and to stakeholders. • Driving and facilitating Scrum ceremonies and Ad-Hoc meetings. • Helping the Business Analyst digest business needs and convert them into stories. • Coordinate tasks with third parties.

Industry sector: Banking		
Project Manager at Technisys		
2019-07-08 – 2022-04-29		
Project descriptions:	Responsibilities: Managed a critical project turnaround for a major local bank, by stepping in to lead a disheartened team and revitalize a project that was significantly behind schedule when I first joined. Focused on motivating the team, implementing Agile methodologies, enhancing communication, and planning for incremental value delivery , resulting in a remarkable transformation. Later on in my tenure, as a seasoned Scrum Master, I guided product engineering teams through iterative development cycles, fostering collaboration, transparency, and continuous improvement, helping develop the team's Scrum adoption. Tasks: • Scope, budget and schedule analysis and planification. • Team leadership • Communication Management, including reports both inhouse and to stakeholders. • Driving and facilitating Scrum ceremonies and Ad-Hoc meetings. • Change Management

Industry sector: Auditory		
Project Manager / Scrum Master at TCS		
2010-10-04 – 2019-07-05		
Project descriptions:	Responsibilities: In TCS i embarked on a journey of growth within the company, starting humbly in a support role and progressing through a series of leadership positions. From a Team Leader and Business Analyst to an Operations Manager, I honed a diverse skill set that ultimately propelled me to the role of Project Manager. Here i handled several projects in industries ranging from Credit, Retail and Auditing. This evolution underscores my adaptability, dedication, and capacity to lead multidisciplinary teams to success in complex IT projects. Tasks: <ul style="list-style-type: none"> • Scope, budget and schedule analysis and planification. • Team leadership • Communication Management, including reports both inhouse and to stakeholders. • Driving and facilitating Scrum ceremonies and Ad-Hoc meetings. • Change Management • Requirement elicitation. • Documenting Requirements.
